

Teacher Notes

Vocabulary to revise/teach

- General: numbers, colours
- Verbs: eat, run, swim
- Adjectives: big, dangerous, furry, long, small, spikey
- Nouns: antlers, beak, claws, flippers, grass, hump, legs, neck, tail, tusks

Suggested activities:

- Cut-up the animal names. See if students can match them to the correct animals on the map. Get them researching on the internet or reading books to find out about animals they don't know!
- Copy and cut up the descriptions. Read out the clues one by one. Students guess the animal. The student with the correct answer can place the description next to the correct animal on the map.
- Ask students to place more animals on the map - they can draw them or use pictures.
- Follow-up: Model sentences like the above, e.g. It is _____. It has _____ legs. Ask students to write three sentences about an animal then describe to small groups who try to guess the animal.

Answers

<p>It is small. It has a tail. It lives in North America. CHIPMUNK</p>		<p>It is black and white. It can swim. It lives in Antarctica. PENGUIN</p>	
<p>It is big. It is black and white. It eats grass. PANDA</p>		<p>It is long. It is dangerous. It lives in South America. SNAKE (ANACONDA)</p>
