Wonderful world

We use the word environment in many different ways. When we talk about the environment, we may just mean our immediate surroundings, and everything around us that we can see, smell, taste, touch and hear.

The environment is all around us.

The word environment can mean something much bigger than this. It can mean all the things that we need to stay alive. That means the land we live on, the air we breathe, the food we eat and the water we drink. It can even mean the whole of the natural world.
